11. Health Department

Discussion :

Pictures were shown on how the child labour was inhumanly tortured. Children were recruited to feed the labour market from the villages. They were also recruited for the purpose of immoral human trafficking for sexual exploitation. Such children do not enjoy normal childhood; they are made to work under slavery conditions with virtually no recreation allowed. Large groups of children were forcibly taken by train. Those children who resisted in getting recruited, their families were not even spared. In the meeting data showing millions of children being trafficked for child labour were highlighted.
